Enclosure 4: Agenda Item 7.a – MBK Engineer's Report

b. Ongoing Maintenance Items (Informational)

Engineer Moncrief gave an updated on District Operations and Maintenance.

The FEMA/CalOES reimbursement is expected within 6-8 weeks. There will be some additional payment request forms and Final closeout documents for signature.

The subventions program Fiscal Year has ended. Tina and Nichole will begin putting together the reimbursement submittal.

There is \$340,000 identified for the District this year. There is fiscal capacity for routine maintenance and seepage project, if desired. There is also a sinkhole repair that could be completed for under \$25,000 to shore up the waterside. The General Manager could authorize this repair.

Yolo County is funding the Flood Safety Plan Update which will include up to date Emergency Operation Plan and Flood Contingency Map. There is a new opportunity for the District to engage with other regional agencies, as part of the new Basin Multi-Agency Coordination concept. The Basin Group MAC will work together to support emergency response and on local outreach with county/state/federal agencies to have a stronger local voice. The Board directed MBK to arrange for a presentation at the next Board meeting.

#### 8. Financial Management (Informational/Action)

b. July Financial Manager's Report

Enclosure 6: Agenda Item 8.b – Financial Manager's Report

District Staff review the financial manager's report. The Board asked for staff to provide a fiscal year budget summary at the next board meeting.

#### 9. Little Egbert Project Update (Informational Only)

DWR hosted a local agency coordination meeting at SCWA attended by SCWA, the City of Rio Vista, and Solano County. The discussion centered around the southern connection between the Mellin Levee and RD 536 levee. There is likely to be a follow-up meeting.

LEJPA recently requested that DWR host a local Reclamation District meeting to discuss the project.

LEJPA staff are continuing to work on two agreements with the State. Staff are closing out the grant with CNRA and having discussions with DWR on extending the funding agreement with DWR.

**AGENDA ITEM 6.a** 

# Reclamation District 2084 BOARD OF TRUSTEES COMPENSATION POLICY PROPOSED UPDATE AS OF OCTOBER X, 2025

In recognition of the time and effort each Trustee dedicates to the governance and support of Reclamation District 2084 ("RD 2084"), this policy establishes clear, legally compliant rules for Trustee compensation and reimbursement of expenses. This policy is adopted pursuant to California Water Code §§ 50605, 20200–20202, and Government Code §§ 53232–53232.4.

#### I. Compensation for Services

- A. Compensable Services. RD 2084 expects each Trustee to attend meetings, as defined by section §54952.2 of the Government Code, including by not limited to Regular, Special or Emergency meetings of the Board as well as standing Committee meetings or temporary committee meetings as part of their responsibility as a Trustee. This includes any congregation of a majority of the members of a legislative body at the same time and location, including teleconference location as permitted in Section §54953, to hear, discuss, deliberate, or take action on any item that is within the subject matter jurisdiction of the legislative body. Trustees may claim compensation only for services "actually and necessarily performed," including:
  - Attendance at Regular, Special, or Emergency Board meetings;
  - Attendance at standing or ad hoc committee meetings;
  - Participation in advisory body meetings or other meetings where the Trustee represents RD 2084;
  - Attendance at conferences, training, or organized educational activities directly related to District business; and,
  - Any additional activities explicitly identified in a publicly adopted Board resolution or policy as constituting official duties.
- B. Daily Rate of Compensation: Trustees shall receive \$100 per day of service. Compensation shall be limited to no more than 10 days per calendar month, consistent with Water Code § 20201.
- C. Annual Adjustments: The Board may adopt an ordinance to increase compensation, provided that the increase does not exceed 5% for each calendar year following the last adjustment, as authorized by Water Code § 20202.

#### II. Eligibility.

A Trustee is eligible for compensation under this policy only if they are not simultaneously receiving other direct compensation (salary, stipend, or retainer) from a third party for the same or similar services in support of RD 2084 on the same day.

#### III. Reimbursement of Expenses.

Trustees will be reimbursed for expenses including but not limited to: registration for events for which attendance is required and/or requested by the Board, mileage exceeding twenty (20) miles round trip at the IRS Standard Mileage Rates for meetings and events outside of regular Board meetings, and bridge/road tolls incurred to attend business on behalf of RD 2084. Trustees will NOT be reimbursed for the following expenses: mileage for regular Board Meetings and meals outside of required overnight travel. If requested by the Board, reimbursable costs for overnight travel include lodging accommodations and meals, up to the standard State per diem rate for travel within California and the Federal per diem rate

1622677v1 Page 1 of 2

for travel outside of California. Exceptions may be made to the reimbursement policy with prior approval of the Board.

#### IV. Annual Maximum.

No Trustee shall receive compensation for more than 10 days of service in any calendar month.

#### V. Payment.

- A. Submission of Payments. Trustees must submit requests for compensation and reimbursement using the District's Standard Expense Reimbursement Form. Requests shall include receipts where applicable and must be submitted no more than once monthly.
- B. Approval and Payment. The District's financial manager shall process requests submitted by the 15th of each month for payment at the next regularly scheduled Board meeting. All approved reimbursements shall be documented in the Financial Manager's monthly report to the Board.

#### VI. Tax Documentation.

Each trustee is required to submit IRS Form W-9. RD 2084 will issue form 1099 for tax purposes.

Described below are the items constituting the engineer's report to be discussed at your scheduled November 2025 meeting.

**FEMA/OES Coordination:** The recent OES information backcheck has been completed. Payments, proof of payments and invoices have all been verified numerous times by multiple staff. We should receive a notice of payment email soon; which typically means funds should be received within 1-2 months. This is a good sign that FEMA/EOS funds should be received prior to end of Calendar year.

**2024-25 Subventions**: Your claim was submitted to DWR mid-October. The total dollar amount was \$421,258.34, see attached summary. This project included a large project to stabilize our main seepage area and setback the levee at the 2023 erosion slip site. Due to engineering expenses and construction, we exceeded our application amount. We will need to request an amendment to our program agreement. Once the amendment is approved, depending on the DWR deductions we anticipate reimbursement close to \$311,900.

**2025-26 Subventions**: This years program is for \$16 Million program-wide. This is sufficient funding to cover all maintenance activities. Your application requested coverage for up to \$342,000 (maintenance cap is \$107,44) of eligible expenses. This will provide coverage for potential seepage repair beyond routine maintenance, and erosion repair work this fall.

#### **Fall-Winter 2025 Activities:**

- 1) Erosion Monitoring-Repair: See attached photo set of as-built repairs from the recent small project to address serious erosion sites. District should continue to monitor erosion and movement on the waterside of the levee.
- 2) Animal Control: Continue to patrol for rodent/beaver activity, potential burrow locations will be staked for observations. Animal activity impacting levee embankments can cause rapid changes in conditions that could lead to a levee embankment failure
- 3) Seepage Repair and monitoring: Continue to monitor change in conditions during routine inspections. There are minor repairs at the seepage berm near station 215+00 that need to be performed prior to the flood season.
- 4) Flood Season monitoring: During the flood season we need to start considering flood monitoring once we get larger storm events. Attached are current action/trigger pages from your EOP, and links are below to support access to those monitoring gage site locations. Consider checking these sites and get familiar with the tools and links to support your emergency planning. MBK will continue to monitor and coordinate with the District and staff throughout the flood season.

**Emergency Operation Plan Update and Basin Group Agreement:** Yolo County is funding your Flood Safety Plan update. As part of this update, the District will receive a current Emergency Operation Plan, and Flood Contingency Map. This will include new trigger elevations based on learned experiences over the last several flood events along with new tools and appendices to support emergency operations, and engagement with outside

agencies. Part of this change includes the new Basin Group MAC concept. KSN will be presenting information on this subject.

**Delta Stewardship Council** – The California Department of Water Resources has filed Certification of Consistency with the Delta Stewardship Council for the Delta Conveyance Project (DCP). Appeals on the DCP Certification of Consistency can be submitted to the Council until November 17. The Council has received three comment letters on the DCP appeal process from Delta public agencies and non-governmental organizations requesting an extension to the appeal deadline. Copies of the letters were included in the October Council meeting packet.

**Delta Protection Commission** – At its next meeting on November 3, the Commission will discuss the DCP Certification of Consistency and the Commission's procedural options for a potential response. This will be the first meeting led by the Commission's new executive director Amanda Bohl.

#### Letters Submitted to DSC on the Certification of Consistency for the Delta Conveyance Project

- Comment Letters Received on DCP Consistency Determination:
  - Delta Public Agencies Comment Letter (County of Sac, Sac County Water Agency, SASD, County of Solano, County of San Joaquin, County of Yolo, and City of Stockton)
  - NGOs Letter (Restore the Delta, Sierra Club, Enviro Water Caucus, Planning and Conservation League, California Water Impact Network, Friends of the River, AquaAlliance, CA Sportfishing Protection Alliance, Center for Biological Diversity)
  - o San Francisco Baykeeper
- Summary of comments in letters:
  - Request time extension for submitting appeals on Consistency Determination due to volume of materials submitted as part of Consistency Determination and competing deadline associated with DCP proceedings
  - O Inappropriate for DWR to submit Consistency Determination when it lacks the water rights to operate the proposed diversions
  - During litigation, DWR stated that information from geotechnical activities was necessary to determination whether DCP was consistent with Delta Plan, but geotechnical work has not been completed; appeal court recently overruled previous hold put on geotechnical activities. It's anticipated these activities will resume.

#### **Upcoming Meetings**

DSC – Next meeting November 20.

<u>Delta ISB</u> – Next meeting November 12.

<u>DPC</u> – Next meeting November 3 in West Sacramento. Topics include a discussion on the Certification of Consistency for the Delta Conveyance Project and the Commission's procedural options for a potential response. Delta Conservancy – Next meeting January 28.
